

ATTAIN INSIGHT INTRINSIC™

The only privacy solution that provides anonymity for biometric and non-biometric PII data

Intrinsic's advanced recognition algorithms, analytics and event monitoring, powered by IBM technology, provide powerful intelligence into the threats and opportunities that might exist in your organization, your customers, or your community.

OVERVIEW

Are you looking to understand the people who form your community, workforce or with whom you do business? With Attain Insight Intrinsic, you can establish “who is who?”, “who knows who?” and “who does what?” in your data and discover non-obvious relationships between people, places, and things.

PRIVACY PROTECTION

Intrinsic enables organizations to:

- Secure and anonymize Personally Identifiable Information (PII) data, including facial recognition and other biometric data
- Meet privacy requirements when data sharing
- Exchange sensitive data with other organizations
- Acquire privacy-protected data for anti-fraud projects.

SERVICES

PROXIMITY SERVICE

Identify multiple entities that are in the same place at the same time
